

To whom this may concern;

I don't agree with the changes that the FCC wants to make. As a Christian it is important that my family and I have a radio station to listen to without all the garbage. In today's society, as Christians we are already forced to stop praying, saying, wearing or bringing bibles in our schools. In our town meetings we can no longer say, "In Jesus' name we pray." What are we doing here? This country was founded by God-fearing people and people wanting to practice their beliefs in God, their Lord, Savior and Heavenly Father. Passing the new rules will force smaller radio stations out of business or will force them to sell ads to people with different beliefs. Where are my rights as a Christian to have a radio station that my family and I listen to without the ads from strip clubs and other places that really promote sin? The Community Advisory Boards will be a joke. People are already selling out Christianity and if the community is not on board with Jesus then they can shut us down. The regulations will force additional staffing that a smaller radio station can not afford or will force many translator stations off the air. As a Christian I'm asking and urging you to Stand up for God. Stand up for God that other agencies in the government are not willing to make. Stand up for God against the beliefs of the atheist. Let's show people that God is worth fighting for and that our God rewards his followers. Our God is a good God and it's time to step up to the plate hit a homerun for him. Please do not pass any regulations that will affect my favorite radio station. I need a radio station that praises my Lord, Savior and Jesus Christ.
